Portfolio: owen.codes

Developer with 9 years of professional experience building intuitive software and full-stack applications. Proficient in Ruby, JavaScript, and C#. Passionate about learning, motivated by solving problems.

Experience

Software Engineer

09/2024 - Present

Nava PBC • Remote

- Designed and implemented core features for the State of Minnesota's Paid Leave web application, supporting claimant submissions and employer leave-approval workflows.
- Authored technical specifications, reviewed pull requests, and led initial implementation of authentication and authorization systems, including login, MFA, access policies, and multi-step claimant application flows.
- Built claims review and approval workflows, user management capabilities, and data export functionality used by employers and program administrators to process leave claims for state benefit payments.
- Led panel interviews, participated in on-call rotations, supported the onboarding of new team members, and triaged and investigated application support tickets.

Software Engineer

03/2020 - 06/2023

VisualLive (acquired by Unity Technologies) • Tempe, AZ

- Owned development and maintenance of VisualLive's customer and administrative web portals, delivering new features, reducing technical debt, and improving application security and resource efficiency.
- Designed and implemented a JSON REST API for metadata CRUD and data streaming, enabling platform integrations and supporting client-facing workflows.
- Improved performance and reliability of 3D file conversion and PDF generation pipelines through workflow optimization and targeted refactors.
- Migrated the platform from Heroku to Azure App Service and re-architected 3D conversion services onto Azure Kubernetes Service to improve scalability, resilience, and workload isolation.
- Supported enterprise clients through technical troubleshooting, conducted security reviews, and led remediation efforts during a security incident involving infrastructure exposure risk.

Software Developer

09/2017 - 03/2020

Freelance • Liberty, MO

- Built a Ruby on Rails ordering application for a coffee retailer, generating \$300K in incremental revenue.

Skills

Languages & Frameworks: Ruby on Rails, JavaScript, HTML/CSS, SQL, C#

Technologies: Git, Docker, Kubernetes, WebSockets, RESTful APIs, gRPC, WebGL

Databases: PostgreSQL, MongoDB, Redis

Cloud Services: Azure (Azure Kubernetes Service, Azure App Service), AWS (S3, ECS), Heroku, DigitalOcean

Testing & CI/CD: RSpec, Capybara, GitLab CI
